**DETAILED ACTION**

1. This is in response to applicant's arguments filed on 04/06/2009.

The following is the current status of claims:

Claims 2, 6, 10, 14 and 15 have been canceled.

Claims 1, 3-5, 7-9, 11-13 and 16-17 remain pending for examination.

The Drawing submitted on 03/20/2003 is acknowledged.

***Response to Arguments***

Applicant's arguments, filed on 04/06/2009, with respect to the pending claims have been fully considered and are persuasive, as a result, the amendment to the claims overcome the rejection. Therefore, the rejection of the last Office action has been withdrawn.

### **REASONS FOR ALLOWANCE**

With respect to claims 1, 3-5, 7-9, 11-13 and 16-17 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1, 5 and 9, the claimed features "wherein generating a revised update message having a next most recent version format includes receiving a first update message and calling a next most recent version mapping function to map contents of the first update message to generate a second update message" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record. With respect to the independent claim 13, the claimed features "wherein the network switching device receives a first update message; a mapper to call a next most recent version mapping function to map contents of the first update message to generate a second update message" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

The closest prior art, Flynn et al., EP No. 0520459 A2, relates to an information retrieval system, facilitates the indexing and retrieval of historical versions of information objects.

Hug, USPT No. 5,806,078 relates to systems for minimizing storage requirements by storing delta-formatted versions of such documents and systems that generate difference reports to facilitate comparisons between different versions of a document.

Eisenberg, USPT No. 5,970,503 relates to the versioning of the system database and electronic batch records.

Babu et al., USPT No. 6,122,639 relates to computer networks.

Meyer, USPT No. 6,148,329 relates to messaging systems.

Stupek, Jr et al., USPT No. 5,586,304 relates to automatic computer upgrading but fail to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
